BUREAU OF STATISTICS

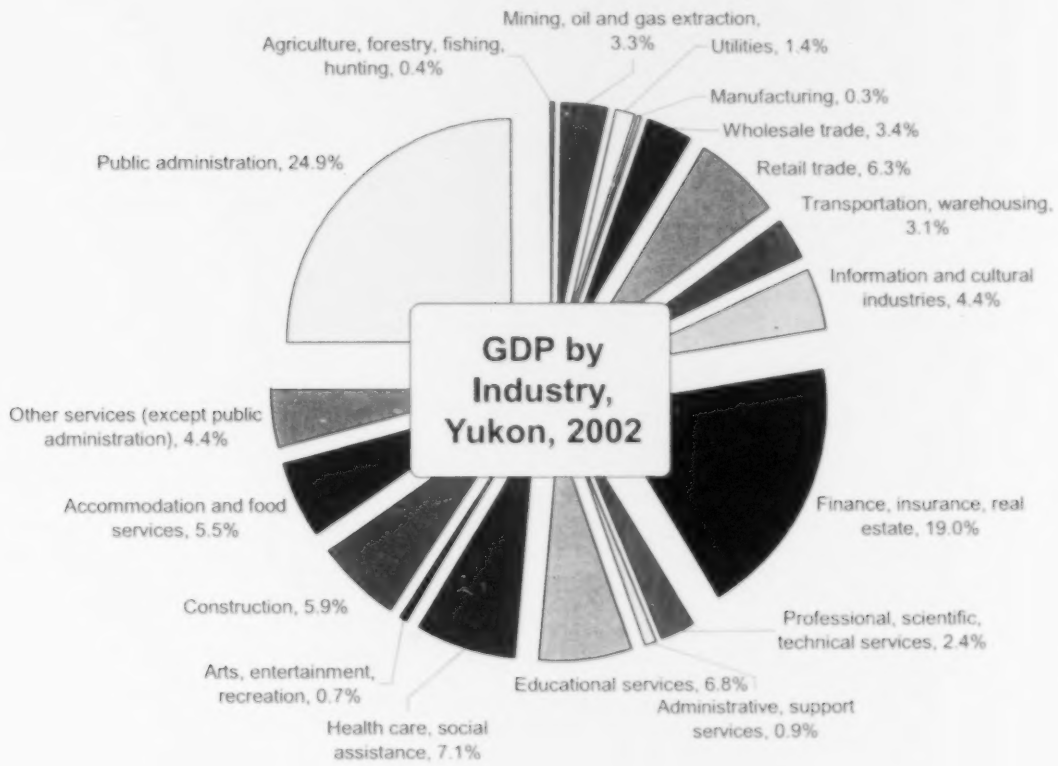
GROSS DOMESTIC PRODUCT BY INDUSTRY

2002

Total Yukon GDP by Industry, 2002	**$1,068,100,000**
Growth Rate from 2001 to 2002	**1.1%**

2002 Highlights

The GDP rose 1.1% in the Yukon, after increasing 1.4% in 2001. The annual increases for 2001 and 2002 represent a modest recovery after the Faro lead-zinc mine closed in 1997 and related operations were subsequently scaled back. In 2002, production in the mining and oil and gas extraction industry sector declined a further 28.8% compared to 2001. In 2002 forestry and logging industry decreased 35.7% over 2001 after showing a 21.7% increase in 2001 over 2000. Retail trade continued to provided a lift to the Yukon economy, increasing by 7.0% over 2001. Residential building construction was also a source of strength, increasing 13.2% over 2001.



GDP by Industry, Yukon, 2002
Mining, oil and gas extraction, 3.3%
Agriculture, forestry, fishing, hunting, 0.4%
Utilities, 1.4%
Manufacturing, 0.3%
Wholesale trade, 3.4%
Retail trade, 6.3%
Transportation, warehousing, 3.1%
Information and cultural industries, 4.4%
Finance, insurance, real estate, 19.0%
Professional, scientific, technical services, 2.4%
Administrative, support services, 0.9%
Educational services, 6.8%
Health care, social assistance, 7.1%
Arts, entertainment, recreation, 0.7%
Construction, 5.9%
Accommodation and food services, 5.5%
Other services (except public administration), 4.4%
Public administration, 24.9%

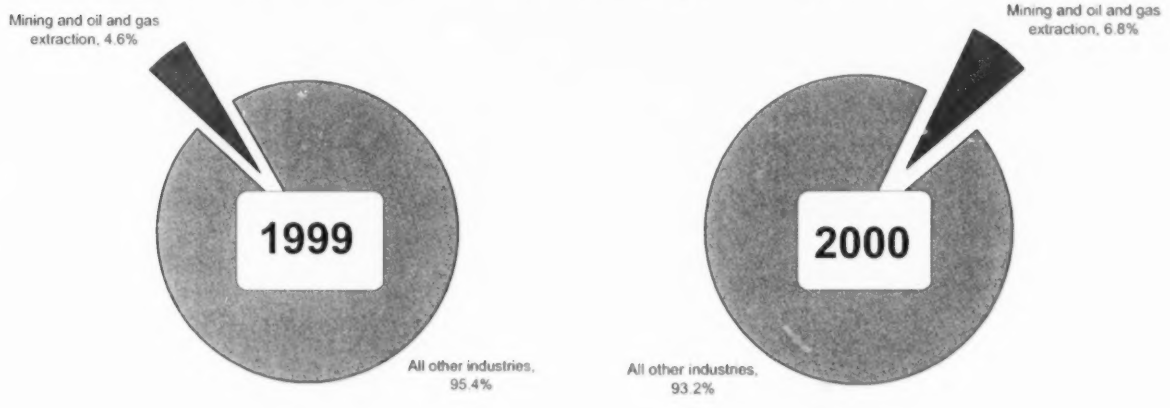
Mining and Oil and Gas Extraction, as a percentage of the Total Nominal GDP by Industry, 1999 and 2000



Mining and oil and gas extraction, 4.6%
1999
All other industries, 95.4%
Mining and oil and gas extraction, 6.8%
2000
All other industries, 93.2%

This analytical report presents Statistics Canada's latest estimates of both Yukon's Real Gross Domestic Product (GDP) by industry in chained 1997 **(inflation-adjusted)** dollars for 1997-2002 and in current **(not adjusted for inflation)** dollars for 1997-2000 (Nominal GDP). The figures should be considered preliminary and subject to revision.

Statistics Canada has adopted a new method of calculating the inflation-adjusted, or real, gross domestic product (GDP)—the **chain Fisher volume index method**. The reason for the adoption of this method is twofold: it produces the most accurate measure of growth in GDP and its components; and, the change brings the Canadian measure in line with the US quarterly Income and Product Accounts which also use the chain Fisher formula to measure real GDP. Use of the chain Fisher index has also been recommended by the United Nations "System of National Accounts 1993", chapter 16.

An important consequence of using chain indexes is that the associated volume measures are not additive. That is, the sum of the chained values for each component of an aggregate does not equal the chained value of the aggregate.

For more information, visit: **http://www.statcan.ca/english/concepts/chainfisher/methodology.htm**

The estimates contained in this publication are produced by Statistics Canada's Industry Measures and Analysis Division, and are not fully reconciled with the overall provincial/territorial GDP figures produced by Statistics Canada's National Accounts and Environment Division. While the general concepts followed in compiling these estimates are consistent with those underlying the Provincial/Territorial Income and Expenditure Accounts, there still remain some statistical differences between the two sets of estimates. Statistics Canada continues to give priority to statistical integration and a narrowing of the differences.

Note on the definition of the Public Administration Industry:

Economic units (companies or establishments) are classified together in the same industry if they are engaged in the same or a similar kind of economic activity. The industrial grouping does not depend upon whether the activity is carried on by a government agency or by a business enterprise. Because so much of the activity commonly understood as 'government' is reallocated and assigned to its related industrial group in the industrial distribution, the 'Public Administration' industry shown in these tables provides a limited view of the full range of government activity. It includes only those establishments of government which clearly do not belong to any other branch of economic activity, but which are essentially concerned with general administration, the internal service agencies of the public sector, and defence.
